

March 21, 2005

**MEMORANDUM**

**TO:** Community Executive Officer / Local Floodplain Administrator

**FROM:** Al W. Goodman, Jr., CFM  
State NFIP Coordinator

**RE:** Mississippi Flood Map Modernization Initiative  
George County Scoping Meeting

The Mississippi Flood Map Modernization Initiative coordination team will conduct its initial 'scoping meeting' with George County and the city of Lucedale on April 5, 2005 at 1:30 PM. This meeting will take place in the Courtroom of the George County Justice Building, located at 368 Cox Street, Lucedale, Mississippi 39452.

The purpose of this scoping meeting is to solicit input from George County and the city of Lucedale regarding the study needs and ensure that the new maps will adequately address these needs by providing more accurate flood hazard information. The Scoping Team will include representatives from MDEQ, as well as MGI, the state's contractor for this project.

During the visit, our Team will be seeking input from county and municipal officials on issues such as:

- How accurate is the information on the Flood Insurance Rate Maps (FIRM) currently used by the communities?
- Are there areas of the community that routinely flood, but are not depicted as flood zones on the current FIRMs?

- Are there areas where new or planned development will increase stormwater runoff and cause flood heights to increase downstream?
- What are your proposed stream study priorities?
- What data are available from the county or communities that might assist in the remapping effort (such as new orthophotography, digital topographic data (LIDAR), GIS data layers, etc.)?

The responses to these and other questions will be used to identify any currently mapped flood sources that should be restudied to reflect current conditions, and any additional sites that need to be studied and delineated on the new maps.

It will be helpful if the county and municipal officials most familiar with both recent and historical flood events, current and future development patterns, and accuracy of current FIRMs are available to meet with the Scoping Team. In addition, this group may include county planning/zoning officials, emergency management personnel, and building officials. Representatives from local offices of state and federal agencies such as MDOT, NRCS or USACE may also have valuable input to the scoping process.

We also encourage the involvement of local engineers and surveyors who are familiar with the current flood maps and topography of George County. Since the new FIRMs will be produced in both printed and digital formats, community GIS personnel may wish to discuss how the new maps can be integrated with other county and city GIS systems.

We look forward to working with you and your staff to provide a superior flood hazard risk map for your citizens. A better map will lead to better floodplain management within your community. If you have any questions, please contact me at 601-366-6325 or through the agency web page at <http://www.msema.org/nfip/nfip.htm>.
