NOTES TO USERS

The map is for use by the Community Flood Insurance Program. It does not represent survey or legal boundaries.

Elevation Reference Marks

Elevation Reference Marks

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of structures during a flood event. The floodway is shown on this map in a solid black line. The floodway width is based on the State of Mississippi requirements for floodway determination. Floodway widths and other cross sections. The floodways were based on hydraulic considerations with regard to stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Flood elevation data presented in the FIRM are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIRM represent rounded whole-foot elevations. These BFEs are shown on the map as shaded areas. There is no BFE shown at this jurisdiction.
