NOTES TO USERS

This map is the end product of the National Flood Insurance Program. It does not depict any of the following items, which may be shown on other maps:

- Federal Emergency Management Agency (FEMA) areas
- roads
- streets
- railroads
- pipelines
- utility lines
- Rocchio Environmental Data Services (REDS) data
- boundaries of special flood hazard areas
- boundaries of special flood hazard areas of different Base Flood Elevations (BFEs)
- boundaries of flood hazard areas subject to flooding from coastal storms
- boundaries of flood hazard areas subject to coastal erosion
- parcels of land
- waterfront property
- coastal areas

Other items that may be shown on this map are explained in the Notes to Users section of this FIRM.

To determine if flood insurance is available in this community, contact your insurance agent or call the 1-877-FEMA-MAP (1-877-336-2627) or visit the FEMA website at http://www.fema.gov.

FIRM maps are subject to revision. To receive current parcel specific elevation information and/or Base Flood Elevations (BFEs), and/or Floodway Data, and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction, please contact the Information Services Branch of the National Geodetic Survey at

1-800-358-9616

Notes to Users Section of this FIRM:

- Referenced to the North American Vertical Datum of 1988
- Flood elevations shown on this map are referenced to the North American Vertical Datum of 1988

To obtain current elevation, description, and/or location information for structures or points of interest, consult the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM. The Flood Insurance Study report also contains a floodway data table that should be used for construction and/or floodplain management purposes when it is higher than the elevations shown on this FIRM.

Coastal Base Flood Elevations (BFEs) and/or other flood elevations on this map may reflect coastal flood hazard information shown on this FIRM. If this is the case, please refer to the map in question for more information.

To verify current corporate limit locations, please contact the Information Services Branch of the National Geodetic Survey at the following address:

National Geodetic Survey
Silver Spring, Maryland 20910-3282

In addition, to search for flood insurance rate maps for other communities, refer to Map Repositories list on Map Index for an overview map of the county community map repository.

Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average 1000-meter Universal Transverse Mercator grid ticks, zone 16

Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations shown on this map apply only landward of 0.0'

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same horizontal datum. The former flood control system is being restored to provide protection from the 1% annual chance or greater flood.

The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of occurring during any given year. This flood is the highest flood that can be expected in the area. The 1% annual chance flood is the level which is used to determine the Base Flood Elevations (BFEs) shown on this map. The Base Flood Elevations (BFEs) and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Base Flood Elevations (BFEs) and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Base Flood Elevations (BFEs) and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Elevations shown on this map apply only landward of 0.0'.
