NOTES TO USERS

The map is not an endorsement by the National Flood Insurance Program. It does not imply endorsement by the Federal Government of the individual plans, projects, or undertakings shown on the map. Information on the map should be considered preliminary until a National Flood Insurance Program (NFIP) Flood Insurance Rate Map (FIRM) has been issued for the area shown on the map. The FIRM is intended to reflect all flood hazard information contained in the original National Flood Insurance Program record. Differences between the flood hazard information contained in the National Flood Insurance Program record and the information shown on the map may result in slight positional differences in map features across jurisdictions. These differences do not affect the accuracy of the FIRM.

Contact U.S. Geological Survey Offices for digital versions of this map. See the Map Repositories list on Map Index for FIRM panel locations.

For additional flood hazard information, see the Floodway and Floodplain Boundary Data bases. For floodway information, please contact the Information Services Branch of the National Geodetic Survey, National Geodetic Survey SSMC-3, #9202 National Geodetic Survey Building, 325 Island Avenue, Suitland, MD 20746; or call (301) 713-3242.

For additional floodplain boundary data bases, see the Floodway and Floodplain Boundary Data bases. For floodway information, please contact the Information Services Branch of the National Geodetic Survey, National Geodetic Survey SSMC-3, #9202 National Geodetic Survey Building, 325 Island Avenue, Suitland, MD 20746; or call (301) 713-3242.
