NOTES TO USERS

The map is for use in administering the National Flood Insurance Program. It does not represent the actual floodplain or any regulatory floodplain boundaries. Use the map in conjunction with the Flood Insurance Study Report for the jurisdiction. The map should be used in conjunction with the Flood Insurance Rate Map (FIRM) for the jurisdiction. The map should also be used in conjunction with the Standard Form 45 (SF-45) for the jurisdiction.

Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study Report should be utilized in conjunction with the FIRM for purposes of construction and/or development.

Flood Elevations, flood depths, or flood velocities necessarily identify all areas subject to flooding, particularly from local drainage sources of flooding. This map is for use in administering the National Flood Insurance Program. It does not necessarily reflect the actual floodplain or any regulatory floodplain boundaries. Use the map in conjunction with the Flood Insurance Study Report for the jurisdiction. The map should be used in conjunction with the Flood Insurance Rate Map (FIRM) for the jurisdiction. The map should also be used in conjunction with the Standard Form 45 (SF-45) for the jurisdiction.
