NOTES TO USERS

The map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of floodwaters. It is intended for flood insurance rating purposes only and should not be used as the sole basis for urban planning or floodplain management.

To order current elevation information or view floodplain information, visit the National Geodetic Survey website at http://www.ngs.noaa.gov/.

Contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242 for information on available bench marks.

These flood elevations must be compared to structure and ground elevations referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. Differences in datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent counties may result in slight positional differences in map features across jurisdiction boundaries.

The 1% annual chance floodplain boundary is the limit of Moderate Wave Action Delineation. To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued cross sections. The flood elevations shown on this map apply only landward of 0.0' O.D. Elevations shown in the Summary of Stillwater Elevations apply only to the landward boundary of Zone A.

The FIRM for this jurisdiction was published on November 17, 2009. For community map revision history prior to countywide mapping, refer to the Community Map Revision History Table.
