NOTES TO USERS

The map is for use in administering the National Flood Insurance Program. It is not intended for surveying or other professional applications. This product is a generalized version of the flood hazard information available in the Flood Insurance Study report. The flood elevations shown on the map are based on the best data available at the time of publication. Flood elevations and the 1% annual chance flood shown on this map may differ from what is shown on the Flood Insurance Study report. Flood elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that these flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. The 1% annual chance flood shown on this map does not represent the actual 1% annual chance flood. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

This map was produced through the Mississippi Flood Map Modernization Initiative, a partnership of the U.S. Geological Survey and the U.S. Army Corps of Engineers, with funding provided by the Mississippi Public Service Commission. The content of this product is based on information provided to the U.S. Army Corps of Engineers and the U.S. Geological Survey by local governments and other sources. No warranty is expressed or implied, and the content is provided "as is" without warranty of any kind, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. The map user is encouraged to verify the accuracy of the information in this product by contacting the appropriate local government agency.

To obtain more detailed information on areas that are affected by flood hazards, contact the Federal Emergency Management Agency Regional Information Center at 1-877-336-2627 or visit the website at http://www.fema.gov. This location is not intended to be an endorsement or referral endorsement of a specific provider of flood insurance, but is intended for flood insurance rating purposes only and should not be used as the sole basis for acquiring flood insurance. For questions about this map or questions concerning the National Flood Insurance Program in general, please call 1-800-428-4656 or visit the website at http://www.floodsmart.gov.

The Flood Insurance Study report contains authoritative hydraulic data that should be used as the basis for flood insurance rate determinations. Flood elevations shown on this map may reflect floodway data from the Flood Insurance Study report for this jurisdiction. Floodway widths and other cross sections are based on hydraulic considerations and are intended for flood insurance rating purposes only and should not be used as the sole basis for acquiring flood insurance. For information regarding conversion between the National Geodetic Vertical Datum (NGVD 29) and the North American Vertical Datum of 1988 (NAVD 88), contact the National Geodetic Survey at 1315 East-West Highway, Silver Spring, Maryland 20910-3282 or visit its website at http://www.ngs.noaa.gov/.

To obtain current elevation, description, and/or location information for existing floodways, flood elevations, or floodway data, contact the Information Services Branch of the National Geodetic Survey. For information regarding conversion between the National Geodetic Vertical Datum (NGVD 29) and the North American Vertical Datum of 1988 (NAVD 88), contact the National Geodetic Survey at 1315 East-West Highway, Silver Spring, Maryland 20910-3282 or visit its website at http://www.ngs.noaa.gov/.

The map shown above is based on data that was available as of May 2009. For information on the most current flood zone and floodplain information, contact your insurance agent or call 1-877-FEMA-INFO (1-877-336-2466).
