This map was prepared through the Mississippi Flood Map Modernization Program, a cooperative Federal-State initiative funded by the Federal Emergency Management Agency (FEMA). This product contains data provided by the U.S. Geological Survey, U.S. Army Corps of Engineers, U.S. Army Engineer Division of New Orleans, U.S. Army Corps of Engineers Waterways Experiment Station, U.S. Geological Survey, and the Climate Data Laboratory of the National Oceanic and Atmospheric Administration.

Geographic coordinates referenced to the North American Vertical Datum of 1988 (NAVD 88). Users should note that FEMA bases all flood elevation data presented in the FIS report should be utilized in conjunction with floodway data presented in the Floodway Data tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Section 508 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), requires Federal agencies to make reasonable efforts to provide information in alternative formats. Contact the National Geodetic Survey at the following number if you have questions regarding the North American Vertical Datum of 1988:

Contact the National Geodetic Survey at (301) 713-3242 for information on conversion to the North American Vertical Datum of 1929 (NAVD 29) and the North American Vertical Datum of 1930 (NAVD 30). Users of this FIRM should be aware that some pre-existing flood profiles were based on a surface water at rest elevation datum, and flood elevations presented in the FIS report are referenced to the North American Vertical Datum of 1988 (NAVD 88). Map users should also be aware that data published in the FEMA National Flood Insurance Program (NFIP) Flood Insurance Rate Maps (FIRM) may reflect stream channel distances that differ from those shown on the map. If the local government has developed stream channel data that conform to these new stream channel configurations, the flood elevation data presented in the FIS report should be utilized in conjunction with floodway data presented in the Floodway Data tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM.
