NOTES TO USERS

The map is for use as an overlay with the National Flood Insurance Program's (NFIP) Flood Insurance Rate Maps (FIRMs). A data set representing the community included in this FIRM is available from the Flood Insurance Rate Map (FIRM) Data Viewer at the National Flood Insurance Program's (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer website at http://floodmaps.fema.gov/firm/viewer. The data set contains three major components: flood plain information, land use information, and elevation information.

The elevation information is contained within the National Flood Insurance Program's (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer. The elevation information is drawn from a variety of sources, including photogrammetric surveys, topographic maps, and contour maps. The elevation information is used to determine the Base Flood Elevations (BFEs) shown on the map.

The flood plain information is contained within the National Flood Insurance Program's (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer. The flood plain information is used to determine the flood zones shown on the map.

The land use information is contained within the National Flood Insurance Program's (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer. The land use information is used to determine the flood zones shown on the map.

The map is intended for use in flood insurance rate making for the NFIP. The map is not intended for use in any other purpose.

FIRM FLOOD INSURANCE RATE MAP
FORREST COUNTY, MISSISSIPPI
AND INCORPORATED AREAS
"FIRM" is an acronym for Flood Insurance Rate Map.

FIRM panel data is available for download at the National Flood Insurance Program’s (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer website at http://floodmaps.fema.gov/firm/viewer. The data set contains three major components: flood plain information, land use information, and elevation information. The elevation information is contained within the National Flood Insurance Program’s (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer. The elevation information is drawn from a variety of sources, including photogrammetric surveys, topographic maps, and contour maps. The elevation information is used to determine the Base Flood Elevations (BFEs) shown on the map. The flood plain information is contained within the National Flood Insurance Program’s (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer. The flood plain information is used to determine the flood zones shown on the map. The land use information is contained within the National Flood Insurance Program’s (NFIP) Flood Insurance Rate Map (FIRM) Data Viewer. The land use information is used to determine the flood zones shown on the map.

The map is intended for use in flood insurance rate making for the NFIP. The map is not intended for use in any other purpose.
