For an overview map of the county or visit its website at http://www.fema.gov/business/nfip/
Areas in which flood hazards are undetermined, but possible.

This map was produced through the Mississippi Flood Map Modernization Initiative, a FEMA website at https://www.fema.gov/business/nfip/

Verify current corporate limit locations.

If you have questions about this map or permission concerning the National Flood Insurance Program, contact the FEMA Map Service Center, 1-800-328-0234 for information or available services.

Acquire additional flood hazard information.

Data were computed at cross sections and interpolated between horizontal datum 23 feet.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988.

Certain areas not in Special Flood Hazard Areas may be protected by floodways.

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of structures and other obstructions to reduce damages from floods.

Flood elevations from National Flood Insurance Program (NFIP) data.*

5000-foot grid values: Mississippi State Plane coordinate system (301) 713-3242

Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of structures and other obstructions to reduce damages from floods.

Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

As well as a listing of the panels on which each community is located.

In cooperation with the State Floodplain Management Agency, the Mississippi Floodway Map was produced through the Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report (which contains authoritative hydraulic data) and/or digital versions of this map.

Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey SSMC-3, #9202.

Important: If you determine that some data are not in agreement, work closely with the Flood Insurance Study (FIS) team.

If you determine that some data are not in agreement, work closely with the Flood Insurance Study (FIS) team.

Coastal flood elevations are also provided in the Summary of Stillwater Elevations table.

All areas of the annual floodplain shown on the New Peak Flood Elevation surface are shown on this New Non-Flood Insurance Rate Map (NFIRM) panel.}

The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.
