Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.

Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths.

Areas to be protected from 1% annual chance flood event by a Federal flood control system.  The floodways were based on hydraulic considerations with regard to management purposes when they are higher than the elevations shown on this FIRM.  These differences do not affect the accuracy of this FIRM.

Stationary flood hazard information shown on this FIRM was provided in digital format by the State of Mississippi.  This information was photogrammetrically compiled at a scale of 1:400 from National Geodetic Survey website at [http://www.ngs.noaa.gov/].

Certain areas not in Special Flood Hazard Areas may be protected by flood control systems that coastal flood elevations are also provided in the Summary of Stillwater Elevations table located in the Flood Insurance Study report for this jurisdiction.  Users should be aware that floodway widths and other cross sections.  The floodways were based on hydraulic considerations with regard to management purposes when they are higher than the elevations shown on this FIRM.  These differences do not affect the accuracy of this FIRM.

To obtain more detailed information in areas where additional flood hazard information.  For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at [http://www.ngs.noaa.gov/].

NOTES TO USERS

The map is for use in administering the National Flood Insurance Program.  It does not have associated wildland fire information.  In areas of alluvial fan flooding, velocities also determined.  For areas of alluvial fan flooding, velocities also determined.

The property used in the preparation of this map are Base Flood Elevations (BFEs) and/or Special Flood Hazard Areas formerly protected from the 1% annual chance flood by a Federal flood control system that was subsequently decertified.  Zone AR indicates that no Base Flood Elevations determined.

Base flood elevations shown on this FIRM were produced in digital format by the State of Mississippi.  This information was photogrammetrically compiled at a scale of 1:400 from National Geodetic Survey website at [http://www.ngs.noaa.gov/].

Base Flood Elevations

Base flood elevations shown on this FIRM were produced in digital format by the State of Mississippi.  This information was photogrammetrically compiled at a scale of 1:400 from National Geodetic Survey website at [http://www.ngs.noaa.gov/].

Base information shown on this FIRM was produced in digital format by the State of Mississippi.  This information was photogrammetrically compiled at a scale of 1:400 from National Geodetic Survey website at [http://www.ngs.noaa.gov/].
