This Federal Emergency Management Agency publication provides a map of flood hazard information for Hancock County, Mississippi, with Special Flood Hazard Areas (SFHA) designated as Zones A and X. The map illustrates flood risk areas and is intended for use in the National Flood Insurance Program (NFIP) to help mitigate flood risks. The map shows flood elevations referenced to the North American Vertical Datum of 1988, and coastal flood elevations are also provided. Areas in Zones A and VE have been identified as having a 1% annual chance of flooding, while Areas in Zone X have a lower probability of flooding. The map includes information on Base Flood Elevations (BFEs) and floodway data, with floodways representing the channels of streams that must be kept free of obstructions. The map is useful for planning, building, and insurance purposes, and contact information is provided for obtaining current corporate limit locations and elevation information. For further details, the website at http://www.msc.fema.gov/ should be consulted.
