This map is for use in administering the National Flood Insurance Program. It does not represent current topography or current flood elevations. A Flood Insurance Rate Map (FIRM) panel should be used to determine flood elevations and flood hazards in this area. The map may have been revised since the date of issuance. To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-358-9620.

The AE Zone category has been divided by a transect line shown below. These areas are subject to flood heights in excess of those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that appear on the map are as determined by the Floodway Study report for this community.

For additional flood elevations and flood hazards, contact the National Flood Insurance Program at 1-800-638-6620.

The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://www.msc.fema.gov.

Select Fax or questions concerning the National Flood Insurance Program should be directed to the National Flood Insurance Program at 1-800-336-FLOOD (3563)-2627. For questions concerning the National Flood Insurance Program visit the website at http://www.fema.gov. National Flood Insurance Program requirements of the National Flood Insurance Program. Floodway widths and other stream channel configurations. As a result, the Flood Profiles and Floodway Data tables should be used for construction and/or floodplain management. Any attempt to use the data from the FIS or the FIRM for purposes of construction and/or floodplain management will result in incorrect decisions.

Boundaries of the AE Zone category have been determined by modeling stream channel configurations. Base Flood Elevations, flood depths, or flood velocities that differ from what is shown on this map. Boundaries of the stream channel distances that differ from what is shown on this map. Boundaries of the stream channel configurations. As a result, the Flood Profiles and Floodway Data tables should be used for construction and/or floodplain management. Any attempt to use the data from the FIS or the FIRM for purposes of construction and/or floodplain management will result in incorrect decisions.

Previously determined flood elevations for this panel are shown on the previous FIRM for this jurisdiction. The flood elevations and flood hazards that appear on the map are as determined by the Floodway Study report for this community.

To obtain more detailed information in areas where flood hazards are undetermined, but possible, please refer to the separately printed Floodway Study report for this jurisdiction.

For additional flood elevations and flood hazards, contact the National Flood Insurance Program at 1-800-638-6620.

Base Flood Elevation value where uniform within zone; elevation information shown on this FIRM was provided in digital format by the State of Mississippi. Accordingly, flood elevation data presented in the FIS is intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. These flood elevations must be compared to structure and ground elevations referenced to Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988.
