NOTES TO USERS

This map is to be used in administering the National Flood Insurance Program. It does not include land use and zoning information or any other county or city maps and should be used for possible purposes in flood insurance decisions only. It is the responsibility of the user to determine the applicability of additional or supplementary data and whether the data are up-to-date and/or complete. The user should also be aware that other factors affect the user’s decision, for example, structures not covered on this map may be subject to flooding. The Flood Insurance Rate Map (FIRM) is to be used in conjunction with the FIRM source of flood elevation data. The elevation from the vertical datum shown on the FIRM is not subject to revision. The elevation shown should be used in lieu of or in addition to any other data or sources. The National Flood Insurance Program recommends that all flood insurance policies be based upon flood elevations shown on the FIRM.
