NOTES TO USERS
This map is for use in administering the National Flood Insurance Program. It shows the flood hazard information necessary to identify areas subject to flooding and to determine whether a property is protected or not by the community’s flood protection system. The community’s flood protection system may vary in type and extent, and may require additional flood protection measures, depending on the community’s flood protection program.

The community should consult with the FEMA Flood Insurance Rate Map (FIRM) of all areas subject to flooding in the community. The FIRM is an updated version of the Flood Insurance Rate Map (FIRM). It shows the community’s flood protection system in a color-coded format. The community can use the FIRM to identify areas subject to flooding and to determine whether a property is protected or not by the community’s flood protection system.
