This map is used in administering the National Flood Insurance Program. It shows the flood hazards at the time last updated. Additional flood hazard information may be available in the community. The map is subject to errors, omissions, and possible misinterpretation by the user. The user is urged to consult the Flood Profiles and Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction before determining an allowable floodplain development decision.

This map is produced through the Mississippi Flood Map Modernization Initiative, a cooperative partnership between the State of Mississippi and Department of Homeland Security/Federal Emergency Management Agency. This map reflects more detailed and up-to-date stream channel configurations than those in the VE Zone. The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The 1% annual chance flood is the primary consideration for determining the Base Flood Elevations on this map. The LiMWA represents the approximate landward limit of the 1.5-foot breaking wave. Base Flood Elevations on this map are referenced to the North American Vertical Datum of 1988. Differences in vertical datum may reflect the fact that the LiMWA was defined with respect to Mean Lower Low Water (MLLW) while the VE Zone and the Zone A Base Flood Elevations were referenced to Mean Higher High Water (MHHW). The LiMWA is not equivalent to the MHHW. The map was produced through the Mississippi Flood Map Modernization Initiative.

To determine if flood insurance is available in this community, contact your insurance agent or call 1-877-336-2627 for more information. To obtain current elevation, description, and/or location information for specific structures, or to contact the National Flood Insurance Program, contact 1-877-336-2627 or visit the www.fema.gov website. For more detailed information, refer to the Flood Insurance Study report for this jurisdiction.
