**NOTES TO USERS**

This map is to be used in conjunction with the National Flood Insurance Program. It shows boundaries of areas subject to flooding, and areas that are determined to be in the floodplain. The community map scale should be considered to be the minimum adequate scale for planning and development. Flood insurance rates for structures and improvements may vary depending upon the community's floodplain management regulations, flood height, and other factors. The purpose of this map is to assist the user in understanding the National Flood Insurance Program. It shows flood risk, and the potential for damage to property and human life from flooding. The user should not rely on this map to determine flood elevations or to make decisions regarding flood hazards.

**Map Index**

Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations were computed at cross sections and interpolated.

**Legend**

- **Base Flood Elevations**: The flood elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should refer to the same vertical datum when placing map orders; the notice to user: The National Flood Insurance Program (FIRM) is a national cooperative effort between the Federal Emergency Management Agency (FEMA) and the States. The FIRM is a tool that provides information about the floodplain and potential flood damage to properties.

**FIRM**

- **Flood Insurance Rate Map (FIRM)**: Provides information on flood hazards, floodplain management, and flood insurance rates for properties. The FIRM is a tool that provides information about the floodplain and potential flood damage to properties. The FIRM is a national cooperative effort between the Federal Emergency Management Agency (FEMA) and the States. The FIRM is a tool that provides information about the floodplain and potential flood damage to properties.

**BASE FLOOD ELEVATIONS**

- **Base Flood Elevations (BFEs)**: The flood elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). Users should be aware that BFEs shown on the FIRM represent rounded whole-foot flood elevations.

**Coastal Base Flood Elevations (BFEs)**

- **Coastal Base Flood Elevations (BFEs)**: Coastal areas have been identified as being in areas subject to coastal flooding. Coastal flooding can be caused by storms, waves, tides, or surge. Coastal areas have been identified as being in areas subject to coastal flooding. Coastal flooding can be caused by storms, waves, tides, or surge.

**Initiative, a cooperative partnership between the State of Mississippi and the Federal Government**

- **Initiative, a cooperative partnership between the State of Mississippi and the Federal Government**: This initiative is a cooperative partnership between the State of Mississippi and the Federal Government. The initiative is a cooperative partnership between the State of Mississippi and the Federal Government. The initiative is a cooperative partnership between the State of Mississippi and the Federal Government.

**Base Flood Elevations**

- **Base Flood Elevations**: The flood elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should refer to the same vertical datum when placing map orders; the notice to user: The National Flood Insurance Program (FIRM) is a national cooperative effort between the Federal Emergency Management Agency (FEMA) and the States. The FIRM is a tool that provides information about the floodplain and potential flood damage to properties.

**By the end of the year, all new flood insurance policies in this county will be based on this new flood map.**

- **By the end of the year, all new flood insurance policies in this county will be based on this new flood map.**: By the end of the year, all new flood insurance policies in this county will be based on this new flood map. By the end of the year, all new flood insurance policies in this county will be based on this new flood map.

**Other pertinent floodway data**

- **Other pertinent floodway data**: Other pertinent floodway data are provided in the Flood Insurance Study report (which contains Floodway Data tables). The floodways were based on hydraulic considerations with structures in the floodplain. The floodways were based on hydraulic considerations with structures in the floodplain.

**Certain areas not in Special Flood Hazard Areas may be protected by levees from 1% annual chance flood.**

- **Certain areas not in Special Flood Hazard Areas may be protected by levees from 1% annual chance flood.**: Certain areas not in Special Flood Hazard Areas may be protected by levees from 1% annual chance flood. Certain areas not in Special Flood Hazard Areas may be protected by levees from 1% annual chance flood.

**Floodway widths**

- **Floodway widths**: The floodway widths are based on hydraulic considerations with structures in the floodplain. The floodway widths are based on hydraulic considerations with structures in the floodplain.

**Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations**

- **Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations**: The boundary dividing Special Flood Hazard Areas of different Base Flood Elevations is the 0.2% annual chance floodplain boundary. The boundary dividing Special Flood Hazard Areas of different Base Flood Elevations is the 0.2% annual chance floodplain boundary. The boundary dividing Special Flood Hazard Areas of different Base Flood Elevations is the 0.2% annual chance floodplain boundary.

**Flood Elevations, flood depths, or flood velocities**

- **Flood Elevations, flood depths, or flood velocities**: Flood elevations, flood depths, or flood velocities are referenced to the North American Vertical Datum of 1988 (NAVD 88). Flood elevations, flood depths, or flood velocities are referenced to the North American Vertical Datum of 1988 (NAVD 88). Flood elevations, flood depths, or flood velocities are referenced to the North American Vertical Datum of 1988 (NAVD 88).

**Other pertinent information**

- **Other pertinent information**: Other pertinent information is provided in the Flood Insurance Study report (which contains Floodway Data tables). Other pertinent information is provided in the Flood Insurance Study report (which contains Floodway Data tables). Other pertinent information is provided in the Flood Insurance Study report (which contains Floodway Data tables).
