Coastal flood zone with velocity hazard (wave action); Base Flood Elevations 2415000 FT

No Base Flood Elevations determined.

2,000 SUFFIX

2430000 FT

23 flood control

Areas to be protected from 1% annual chance flood event by a Federal flood control system.

FEMA Map Service Center

Areas determined to be outside the 0.2% annual chance floodplain.

Map Index

Base Flood Elevations shown on this map are based on the best data available at the time of mapping. Users of this FIRM should be aware that flood elevation data presented in the separately printed Flood Elevations, flood depths, or flood velocities source of flood elevation information. Accordingly, flood elevation data presented in the FIRM represents rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. The Base Flood Elevations shown on the FIRM represent rounded whole-foot elevations. These BFEs are not necessarily identify all areas subject to flooding, particularly from local drainage sources of flood water.

Certain areas not in Special Flood Hazard Areas may be protected by floodways based on hydraulic considerations with regard to the former flood control system is being restored to provide protection from the 1% annual chance flood. Zone AR indicates that flood elevations are referenced to the North American Vertical Datum of 1988.

To obtain current elevation, description, and/or location information for Letters of Map Change, as well as a listing of the panels on which each community is located. Please refer to the separately printed letters of map change table located in the Flood Insurance Study report for this jurisdiction.

To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.

The Flood Elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These BFEs are shown on this map apply only landward of 0.0'.

The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Map Index should be used on insurance applications for the subject community.

The Special Flood Hazard Area shown on the map is based on the best data available at the time of mapping. To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.

Final flood elevations in this community were photogrammetrically compiled at a scale of 1:400 from cross sections. The floodways were based on hydraulic considerations with regard to the former flood control system is being restored to provide protection from the 1% annual chance flood. Zone AR indicates that flood elevations are referenced to the North American Vertical Datum of 1988.

To obtain current elevation, description, and/or location information for Letters of Map Change, as well as a listing of the panels on which each community is located. Please refer to the separately printed letters of map change table located in the Flood Insurance Study report for this jurisdiction.

To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.

The Flood Elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These BFEs are shown on this map apply only landward of 0.0'.

The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Map Index should be used on insurance applications for the subject community.

To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.

The Flood Elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These BFEs are shown on this map apply only landward of 0.0'.

The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Map Index should be used on insurance applications for the subject community.

To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.

The Flood Elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These BFEs are shown on this map apply only landward of 0.0'.

The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Map Index should be used on insurance applications for the subject community.

To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.

The Flood Elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These BFEs are shown on this map apply only landward of 0.0'.

The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Special Flood Hazard Area is the area subject to a 1% annual chance floodplain boundary. The Map Index should be used on insurance applications for the subject community.

To obtain more detailed information in areas where flood elevations are not shown, additional flood hazard information.
