NOTES TO USERS

The map is for use in administering the National Flood Insurance Program. It does not represent current topographic positions of all structures and natural features.

The Flood Insurance Study report (which contains authoritative hydraulic data) may reflect stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management. Boundaries of the Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report may reflect greater detail than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new boundaries. Please refer to the separately printed Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management.

Base floods determined.

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas. CBRS areas and OPAs are also located in areas not in Special Flood Hazard Areas. The floodway is the channel of a stream plus any adjacent areas that must be kept free of structures. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management. Boundaries of the Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management.

This map reflects more detailed and up-to-date requirements of the National Flood Insurance Program. Floodway widths and other flood hazard information. Additional flood hazard information. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management. Boundaries of the Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management.

The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its products associated with this FIRM. Available products may include previously issued Communities table containing National Flood Insurance Program dates for each community verify current corporate limit locations. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to Corporate limits. In the Flood Insurance Study report (which contains authoritative hydraulic data) may reflect stream channel configurations.
