To obtain more detailed information in areas where a cooperative partnership between the State of Mississippi and Department of Homeland Security has been established, please contact the Information Services Branch of the National Geodetic Survey (NGS) at (301) 713-3242 or visit the NGS Information Services web site at http://msc.fema.gov/.

If you have questions about the National Flood Insurance Program in general, please call (1-877-336-2627) or visit the National Flood Insurance Program web site at http://msc.fema.gov/.

Contact the FEMA Map Services Center at 1-800-335-2086 for information on available flood insurance products, flood elevations, or other flood-related information. The FEMA Map Services Center may be faxed by FAX 1-800-335-8667 and its fax number is 1-800-335-3837.

For further information contact: Multi-Peril; Homeowners; Commercial; Public Adjuster Services at 1-800-345-7500.

If you have questions about the FEMA hazard map, call the Multi-Peril; Homeowners; Commercial; Public Adjuster Services at 1-800-345-7500 or visit the National Flood Insurance Program web site at http://msc.fema.gov/.

In general, the National Flood Insurance Program requires a community to adopt and enforce floodplain management regulations that are consistent with the Flood Insurance Study (FIS) report for the community. The FIRM should be used on insurance applications for the subject property.

core longitude - 89°37'30", core latitude - 32°22'30"

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of obstructions. The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The 0.2% annual chance flood (250-year flood) is the flood that has a 0.2% chance of being equaled or exceeded in any given year.

Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths are less than 1 foot. COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS
