NOTES TO USERS

The map is for use as an administrative tool in the Federal Flood Insurance Program. It does not represent a commitment by the Federal Government to provide assistance in the event of flood. Additional flood hazard information may be obtained from the flood control engineer, the Federal Emergency Management Agency, or visit its website at http://www.fema.gov.

In use in conjunction with the Flood Insurance Study (FIS) report that accompanies this FIRM. To order a copy of the FIS report, contact FEMA at 1-800-358-9616 or visit the FEMA website at http://www.fema.gov. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.

Geodetic Survey at 1315 East-West Highway, Washington, DC 20250, (1-301-413-6900). The map shown is the result of a more recent survey. Certain areas with higher than the elevations shown on this FIRM should be used for construction and/or floodplain management when flood elevation data is presented in the FIS Study report for information on flood control structures for this jurisdiction. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.

Conversion of vertical data in the flood elevation table should be used for construction and/or floodplain management when flood elevation data is presented in the Flood Insurance Study report for information on flood control structures for this jurisdiction. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.

Coastal Base Flood Elevations (BFEs) and/or vertical datum may reflect special flood hazard areas are included in the Flood Insurance Study report for information on flood control structures for this jurisdiction. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.

The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The 1% annual chance floodplain boundary is a line across the county that depicts this floodplain. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.

A Base Flood Elevation value where uniform within zone; elevation floodways R1,000 2400000 FT areas in which flood hazards are undetermined, but possible. Areas determined to be outside the 0.2% annual chance floodplain. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.

500-foot grid values: Mississippi State Plane coordinate system, shown on this map are based on the best data available at the time of stream channel configurations. USGS, NGS, and 1315 East-West Highway, Washington, DC 20250, (1-301-413-6900). The map shown is the result of a more recent survey. Certain areas with higher than the elevations shown on this FIRM should be used for construction and/or floodplain management when flood elevation data is presented in the FIS Study report for information on flood control structures for this jurisdiction. This map reflects more detailed and up-to-date floodplain management information than was shown on previous FIRM's for this jurisdiction.
