If you have questions about the Flood Insurance Program in general, please call 1-800-638-6620 or visit the FEMA Map Service Center website at http://msc.fema.gov/

The FIRM is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of water.

This map reflects more detailed and up-to-date floodplain boundaries. These differences do not affect the accuracy of this FIRM.

The National Flood Insurance Program (NFIP) uses the Base Flood Elevations (BFEs) shown on this map to determine the base flood elevation and flood zone for a property for the purposes of flood insurance premium rates. The NFIP considers the flood insurance premium rates of properties located in special flood hazard areas.

If you have questions or need assistance regarding your NFIP policy, please contact your insurance agent or the FEMA Map Information eXchange (FMIX).

The spreading of this information is not an endorsement of the National Flood Insurance Program or its products. The Federal Emergency Management Agency does not endorse private business products and services.

For flood control structure information, please contact the Mississippi Department of Water Resources or similar state authority or the U.S. Army Corps of Engineers.
