The map reflects more detailed and up-to-date flood protection measures than those shown on previous FIRM panels. The map was produced through the Mississippi Flood Map Modernization Initiative, a joint effort of the Mississippi Department of Emergency Management and the Federal Emergency Management Agency (FEMA). The map is intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Flood elevation data presented in the Flood Insurance Rate Map (FIRM) are based on the best data available at the time of the map's production. For areas of alluvial fan flooding, velocities also determined. Microfiche products and Digital Flood Insurance Rate Maps (DFIRMs) may be obtained through the National Flood Insurance Program (NFIP). To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Flood Insurance Study (FIS) reports, Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report, and/or digital versions of this map. If you have questions about this map or information concerning the National Flood Insurance Program, contact the FIRM Map Service Center at 1-800-358-9616 for information on availability of stillwater elevations tables. The DFIRM may also be viewed by the public at www.fema.gov/nfip. To order this FIRM, refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report.
