Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas in which flood hazards are undetermined, but possible.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are not necessarily accurate to the nearest 1/10 foot. The Flood Insurance Study report (which contains authoritative hydraulic data) should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Certain areas not in Special Flood Hazard Areas may be protected by flood control measures such as levees, floodways, and flood defenses. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction. If you have questions about this map or need further assistance, you may contact the FEMA Map Service Center at 1-888-368-3785, or visit its website at http://www.fema.gov, or visit its website at http://www.ngs.noaa.gov/

The National Flood Insurance Program (NFIP) is a cooperative partnership between the State of Mississippi and Department of Homeland Security - Federal Emergency Management Agency. This publication contains National Flood Insurance Program dates for each community within the transacted area. For information on available flood insurance and related requirements, contact the National Flood Insurance Program at 1-800-358-9616.

The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://www.fema.gov.

To obtain current elevation, description, and/or location information for bench marks or digital versions of this map, contact the National Geodetic Survey at (301) 713-3242, or visit the same website at http://www.ngs.noaa.gov/

Table of Stillwater Elevations table should be used for construction and/or floodplain management purposes.

This map was produced through the National Flood Hazard Mapping System, which receives data from the National Flood Insurance Program (NFIP). The map reflects the data at the time it was produced and may not reflect the most current information available. It is important to verify current corporate limit locations.

Central State Flood Elevations, (BFEs) shown on the map apply only landward of 0.0' in the coastal floodplain. Flood elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that the North American Vertical Datum of 1929 (NAD 29), Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, (NAVD 88) are different datums, spheroid, projection or UTM zones used in the production of FIRMs for adjacent states. These differences do not affect the accuracy of this FIRM.
