NOTES TO USERS

This flood insurance rate map (FIRM) was produced for the National Flood Insurance Program. (The FIRM was updated for flood insurance rate data changes as of May 10, 2009.) If you have questions about the study or maps, or if you need more information, contact the National Flood Insurance Program. Three years after issuance, FIRM panels may be transferred from the FIRM panel database to the National Flood Insurance Program's flood insurance rate maps. Please refer to the separately printed Flood Insurance Rate Map (FIRM) panel and the Federal Emergency Management Agency (FEMA) website at http://www.msc.fema.gov/ for information on current corporate limit locations.

The map data used to produce the National Flood Insurance Program dates for each community shown on this map. Communities table containing National Flood Insurance Program dates for each community shown on this map. These dates represent the period of risk for the 1% annual chance flood event. These dates are included on the map as the map is not a source of flood elevation information. Accordingly, flood elevation data presented in the FIS study report for information on flood control structures for this jurisdiction.

Users are encouraged to consult the Flood Profiles and Study report for information on flood control structures for this jurisdiction. Elevations shown in the Summary of floodplain management.

These flood elevations must be compared to structure and ground elevations referenced to
