The map reflects more detailed and up-to-date topographic information as compared to the previous maps. The FEMA Map Service Center is the repository for the National Flood Insurance Program in the United States. FEMA's floodplain maps, known as Flood Insurance Rate Maps (FIRM), are used to determine if a property is located in a floodplain. This information is also used for the determination of flood insurance rates, and may be used in lieu of floodplain management requirements. This map was produced through the Mississippi Flood Map Modernization Initiative, a joint effort of the Federal Emergency Management Agency, the Mississippi Department of Environmental Quality, and the National Geodetic Survey.

The map was produced through the Mississippi Flood Map Modernization Initiative, a joint effort of the Federal Emergency Management Agency, the Mississippi Department of Environmental Quality, and the National Geodetic Survey.

**NOTES TO USERS**

- The map is for use with the National Flood Insurance Program. It is intended to be used for planning purposes and should not be used to determine floodplain management requirements.
- The map was produced through the Mississippi Flood Map Modernization Initiative, a joint effort of the Federal Emergency Management Agency, the Mississippi Department of Environmental Quality, and the National Geodetic Survey.

**LEGEND**

- **Base Flood Elevation (BFE)**: The elevation at which the 1% annual chance flood event is expected to occur.
- **Zone A**: Areas at risk of flooding from the 1% annual chance flood event.
- **Zone V**: Coastal flood zone with velocity hazard (wave action).
- **Zone A99**: Coastal flood zone with velocity hazard (wave action) for areas with a history of waves.
- **Zone AE**: Areas with a history of waves.
- **Zone AR**: Areas with a history of waves that are not presently protected by a flood control system.
- **Base Flood Elevations (BFEs)**: Elevations determined for areas subject to flooding from the 1% annual chance flood event.
- **Future Flood Elevations (FFE)**: Elevations determined for areas where future flood hazards are expected.
- **Other Flood Elevation Zones (OFEZ)**: Elevations determined for areas where flood hazards are undetermined, but possible.
- **Other Flood Elevation Classes (OFEC)**: Elevations determined for areas where flood hazards are undetermined, but possible.

**BASE MAPPING**

- **Map Number**: 28093-0110
- **Scale**: 1" = 2000' (1:24,000)
- **Datum**: North American Vertical Datum of 1988 (NAVD 88)
- **Spheroid**: World Geodetic System 1984 (WGS 84)
- **Projection**: State Plane 1983 (NAD83)/Alaska State Plane 1983 (NAD83)
