NOTES TO USERS
The map is for use in conjunction with the National Flood Insurance Program. It is not to be used in any court proceedings or other legal documents. For current flood insurance rating purposes, please consult the Flood Insurance Rate Map (FIRM). The FIRM is updated on a regular basis and includes new information about flood risk. The FIRM is available online at the Federal Emergency Management Agency’s (FEMA) website: https://www.fema.gov/

If you have questions about the contents of this map, please contact the National Flood Insurance Program at 1-800-358-9616.

The map was produced through the Mississippi Flood Map Modernization Initiative, a cooperative venture between the Mississippi Department of Transportation and the National Flood Insurance Program.

FIRM FLOOD INSURANCE RATE MAP
PIKE COUNTY, MISSISSIPPI
AND INCORPORATED AREAS

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO 1% ANNUAL CHANCE FLOOD

ZONE A
Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood. Base Flood Elevations, flood depths, or flood velocities may reflect stream channel configurations that are no longer applicable to the current conditions. The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights. Zones A and AE are subject to the 1% annual chance flood. Areas of Special Flood Hazard include the 1% annual chance floodplain boundary, the 0.2% annual chance floodplain boundary, and the 0.2% annual chance floodplain boundary plus adjacent areas. The boundary dividing Special Flood Hazard Area Zones and other areas is shown on this map. This boundary is determined by the computer model and calculated using the Most Probable Flood wave (MPF) analysis method. The Most Probable Flood wave is a statistical analysis of flood wave data that includes factors such as water stage, velocity, and water surface elevation.

Other Areas
Areas of flood hazard that are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

CBRS and OPA boundary
Zone D boundary
0.2% annual chance floodplain boundary
1% annual chance floodplain boundary
