NOTES TO USERS
This map is for use in administering the Flood Insurance Program. It does not pertain to the protection of any specific location shown. The accuracy of the flood zone maps and pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction. For information regarding conversion between the National Geodetic Vertical Datum and the North American Vertical Datum of 1988, please call 1-800-358-9620 or visit its website at http://www.ngs.noaa.gov.

Boundaries of the 0.2% annual chance floodplain were established by a Federal floodway and must be kept free of obstructions to permit the free flow of water during a flood event. Nondrainage areas are provided in the Flood Insurance Study report for the community and may be protected by a Federal floodway if and when the floodway is extended to cover those areas.

The boundaries of the 1% annual chance floodplain are shown on this map and are based on the best data available at the time of this preparation. Because changes due to annexations or de-annexations may have occurred since the map was prepared, it is recommended that you refer to the Community Map Repository for information regarding changes to community limits. A list of communities is available on the FEMA website at http://www.fema.gov/business/nfip/ or by contacting the National Flood Insurance Program at 1-877-FEMA MAP (1-877-336-2627).

areas of 0.2% annual chance flood; areas of 1% annual chance flood with average flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations shown in the Summary or FIS report should be utilized in conjunction with the FIRM for purposes of construction, development, and/or floodplain management. Base Flood Elevations shown in the FIRM represent rounded whole-foot elevations. These BFEs are vertical datum values where uniform within zone; elevation values are based on the best data available at the time of map preparation and are shown at each 100-foot interval.

6.6. Base Flood Elevations shown in the FIRM were provided in digital format by the State of Mississippi and state plane Mississippi West FIPS zone 6 projection convert to the National Geodetic vertical datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent states. The differences do not affect the accuracy of this FIRM.

For information regarding conversion between the National Geodetic Vertical Datum and the North American Vertical Datum of 1988, please call 1-800-358-9620 or visit its website at http://www.ngs.noaa.gov.
