NOTES TO USERS

This map is for use in conjunction with the National Flood Insurance Program. It does not reflect current private property boundaries and lots. Property boundaries shown on this map are approximate and should be consulted for possible updates or variances. The map does not reflect revisions to property boundaries that may be required due to annexations or de-annexations. The map shown below should be used in conjunction with the FIRM for purposes of construction and/or flood insurance.

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

ZONE A

Other Flood Areas

Inundation flood heights.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are based on the FIRM shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were determined.

Areas in which flood hazards are undetermined, but possible.

Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths of 3 to 6 feet; and average depths greater than 6 feet.

Inundation flood heights.

Elevation Reference Marks

The National Flood Insurance Study report should be utilized in conjunction with the FIRM for purposes of construction and/or insurance.

To obtain more detailed information in areas where flood elevations are undetermined, contact the National Flood Insurance Service Center at 1-800-358-9620 and its website at 1-877-FEMA MAP or visit the National Flood Insurance Service Center website at http://www.fema.gov/ or its website at http://www.fema.gov/ or contact the National Flood Insurance Service Center.

The floodplains and floodways that were determined.

Inundation flood heights.

Compositions of the floodplains were compared at cross sections and determined.

The floodplains and floodways that were determined.

Inundation flood heights.

Remember to check the map scale on the face of the FIRM to determine the accuracy of the topographic information.

For community map revision history prior to countywide mapping, refer to the Community Map Revision History Table located in the Flood Insurance Study report for this jurisdiction.
