NOTES TO USERS

This map reflects more detailed and up-to-date information than the base Flood Insurance Rate Map (FIRM) from which Flood Insurance Study (FIS) reports were issued. This map is for use in administering the National Flood Insurance Program. It does not reflect: 1) areas required to be protected from future floods by a Federal flood control structure, 2) areas required to be protected from a 1% chance of a coastal flood, 3) areas required to be protected from a 1% chance of a flood caused by wave action, and 4) areas required to be protected from a 0.2% chance of a floodplain boundary and floodplain elevation.

If you have questions concerning conversions of floodplain elevations for your community, contact your insurance carrier or the Community Flood Insurance Study (CFS) representative (see CFS telephone list for nearest office).

For additional information, contact your insurance carrier or the Community Flood Insurance Study (CFS) Representative. The Community Flood Insurance Study (CFS) report that accompanies this FIRM. Users should be aware that differences in geographic coordinates, datum, spheroid, projection or UTM zones used in the production of FIRM for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

To determine if flood insurance is available in this community, contact your insurance agent or call the FEMA Map Service Center.

2,000

The following data were provided by the Community Flood Insurance Study (CFS) representative for this jurisdiction:

- Effective Date of Countywide Map: March 20, 2008
- Flood Insurance Study (FIS) report:
- Flood Insurance Study (FIS) report currently on file:
  - Date of Effective Report: March 20, 2008
  - Date of Report Issuance: March 20, 2008
- Map Number: 280 of 525
- Map Scale: 1" = 2,000 feet
- Map Code Number: 200803142503
- Map Date of Issue: March 20, 2008
