To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program toll-free at 1-877-336-2627 or visit the FEMA Map Service Center website at http://msc.fema.gov. For answers to specific questions about this map or for questions concerning the National Flood Insurance Program in general, please call 1-877-336-2627 or visit the FEMA Map Service Center website at http://msc.fema.gov.

To obtain current elevation, description, and/or location information for this FIRM, contact your insurance agent or call the FEMA Map Service Center toll-free at 1-877-336-2627 or visit the FEMA Map Service Center website at http://msc.fema.gov.

To verify current corporate limit locations, refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that differences in elevation reference marks, vertical datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Coastal flood elevations are also provided in the "Summary of Stillwater Elevations" table in the FIS report. To obtain more detailed information in areas where coastal flood elevations are shown, contact your insurance agent or call the FEMA Map Service Center toll-free at 1-877-336-2627 or visit the FEMA Map Service Center website at http://msc.fema.gov.

The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to 1% or greater annual chance floods. The 1% chance floodplain boundary is the limit of Special Flood Hazard Areas. The 0.2% annual chance floodplain boundary is the limit of flood areas subject to 0.2% annual chance floods. The 1% annual chance floodplain boundary is determined using hydraulic modeling and may be a more accurate indicator of the actual flood hazard than the 0.2% annual chance floodplain boundary. It is important to note that coastal flood elevations are also provided in the "Summary of Stillwater Elevations" table in the FIS report.

To obtain current elevation, description, and/or location information for this FIRM, contact your insurance agent or call the FEMA Map Service Center toll-free at 1-877-336-2627 or visit the FEMA Map Service Center website at http://msc.fema.gov.
