NOTES TO USERS

The map was produced through the Mississippi Flood Map Modernization Initiative, a joint effort involving the National Flood Insurance Program in general, please call 1-877-FEMA MAP (1-877-336-2627) for information on available products associated with this FIRM. Available products include current Flood Insurance Rate Maps (FIRMs), the Flood Profile and Floodway Data tables in the Summary of Stillwater Elevations table, and the Unincorporated Areas coastal flood elevation table. For community map revision history prior to countywide mapping, refer to the Community Map Index for this community. Please refer to the separate project Map Sheets for an overview of the current flood hazard, and to the cross-sections for an overview of the flood depths. The data used in the production of the National Flood Insurance Program's Flood Insurance Rate Maps (FIRMs) are based on the best data available at the time of the production. Differences in datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent communities may result in slight positional differences in map features across jurisdictions. Because changes due to annexations or de-annexations may have occurred since the production of this FIRM, the data in the Brock Control Data Base may not be current.
