NOTES TO USERS

The map is for use in conjunction with the Mississippi Flood Insurance Program. It is not to
be used for engineering purposes. Figures are approximate, and measurements should be
made from this map only if they are clearly shown.

The map was produced through the Mississippi Flood Map Modernization Initiative, a
cooperative partnership between the State of Mississippi and Department of Homeland
Security/FEMA. Products generated by this initiative are intended for flood insurance
rating purposes only and should not be used as the sole basis for floodplain management
decisions. The floodway boundary is provided for rating purposes only and should not be
used to make engineering decisions. The floodway boundary is composed of the
0.2% floodway, 1% floodway, and 100-year floodway. The floodway boundary is for rating
purposes only and should not be used for construction decisions.

Area in Zone AE, the 1% annual chance floodplain, includes those locations subject to
flood elevations in feet above Mean Higher High Water (MHHW) or Mean Lower Low Water
(MLLW) that are equal to or greater than those shown on this map. Zone AE includes
alluvial floodplains, wetlands, and areas adjacent to the Mississippi River not otherwise
protected. For purposes of rating, Zone AE is considered an area of Special Flood Hazard.

Base Flood Elevations determined.

Base Flood Elevations in feet based on the Mississippi State Plane Coordinate System, mean
higher high water (MHHW) and geometric mean elevation of water (GMEW). Elevations were
computed using the 2018 National Elevation Dataset.

To determine if flood insurance is available in this community, contact your insurance agent or call
the National Flood Insurance Program at 1-800-638-6620.
