To determine if flood insurance is available in this community, contact your insurance agent or call 1-877-FEMA MAP (1-877-336-2627). For information regarding conversion between the National Geodetic Datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent states, refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for this jurisdiction.

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas. Areas in which flood hazards are undetermined, but possible.

Areas protected by levees from 1% annual chance flood.

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in damages. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report for this jurisdiction may result in slight positional differences in map features across jurisdiction boundaries due to the absence of a common elevation datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent states. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for this jurisdiction.

Areas determined.

For areas of alluvial fan flooding, velocities also determined.

Boundaries of the floodways shown on this map apply only landward of 0.0' NAVD 88. Users of this FIRM should be aware that floodway widths and other floodway characteristics shown on this FIRM may have been adjusted to conform to these new data. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same datum. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for this jurisdiction.
