NOTES TO USERS

The map is for use in administering the National Flood Insurance Program. It does not represent elevation or vertical datum, topographic features, or property boundaries. The vertical datum is North American Vertical Datum of 1988 (NAVD 88). The Federal Emergency Management Agency (FEMA) encourages users of this National Flood Insurance Program (NFIP) Flood Insurance Rate Map (FIRM) to consult with their localsqrt; building inspector, architect, or contractor to determine if any vertical datum or elevation information is provided in local records. The horizontal datum is North American 1983 (NAD 83). Differences in horizontal datum may have been adjusted to conform to these new standards.

To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-FEMA-1212. A Floodway boundary is a linear feature that identifies the lateral and/or vertical extent of flooding that affects the transportation system. Floodway boundaries are identified in the Floodway layer of this NFIP panel and in the corresponding Digital Floodway Boundary Data (DFBD).

To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-FEMA-1212.
