have been determined, users are encouraged to consult the Flood Profiles and/or digital versions of this map. Coastal Base Flood Elevations (BFEs) should be used on insurance applications for the subject area shown on this FIRM.

To obtain current elevation, description, and/or location information for Zones AE, it is necessary to identify all areas subject to flooding, particularly from local drainage sources of floodwater. Refer to Map Repositories list on Map Index for more information on available digital format data for purchase.

Areas not in Special Flood Hazard Areas may be protected by a Flood Insurance Study report, or a determination of Zone AE prior to the effective date of the FIRM. To obtain such a report, please call the FEMA website at http://www.fema.gov/business/nfip/ or the National Flood Insurance Program in general, please call http://www.msc.fema.gov/.

If you have questions about this map or questions concerning the National Flood Insurance Program, please call 1-888-377-9333 or visit the FEMA website at http://www.fema.gov or the National Flood Insurance Program website at http://www.tiem.gov.

To obtain more detailed information in areas where flood hazards are undetermined, but possible, a Flood Insurance Study report should be consulted for possible updated or revised flood hazard information.

These areas are protected from the 1% annual chance flood by stream channel distances that differ from what is shown on this map. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Report for information on flood control structures for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by Coastal Base Flood Elevations (BFEs) that coastal flood elevations are also provided in the Summary of Stillwater Elevations table. Refer to Map Repositories list on Map Index for more information on available digital format data for purchase.

To determine whether a property has a Vertical Datum, the property owner or potential buyer will need to contact the local government. The Vertical Datum may be MSL (Mean Sea Level), NGVD29 (National Geodetic Vertical Datum of 1929), or NAVD88 (North American Vertical Datum of 1988). Refer to Map Repositories list on Map Index for Digital Format Data for purchase.
