Whether flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average flood depths of 3 to 6 feet (flow in depressions in flat terrain); average flood depths of 6 to 10 feet (flow in narrow channels); and average flood depths of 10 to 15 feet (flow in large channels) are common. The State Plane Coordinate System was used to determine the base flood elevation and values for this jurisdiction.

The Special Flood Hazard Areas (SFHAs) were determined as follows:

- The Special Flood Hazard Area (SFHA) is the area inundated by the 1% annual chance flood event.
- The base flood elevation (BFE) is the elevation of the 1% annual chance flood event.
- The FEMA Map Service Center may also be reached by mail at:
  P.O. Box 143287
  Silver Spring, Maryland 20910

To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-358-9687. If you have any questions concerning the National Flood Insurance Program, please contact the Federal Emergency Management Agency at 1-877-FEMA MAP (1-877-336-2627).
