To reduce flood insurance premiums, the Flood Insurance Study (FIS) program provides detailed hydrologic information and flood hazard data. The FIS includes a Flood Insurance Rate Map (FIRM) which identifies flood hazard zones and base flood elevations. The FIRM is used to determine the risk of flooding and calculate flood insurance rates.

**Community Number**

**Map Number**

A Flood Insurance Study Report, Areas in which flood hazards are undetermined, but possible.

For information on available products associated with this FIRM visit the FEMA website at http://www.fema.gov/ or call the National Flood Insurance Program at 1-877-336-2627 for more details.

**LEGEND**

- **ZONE AE**
  - Areas subject to 1% annual chance floodplain management requirements.
  - Geological foundation for construction.

- **ZONE AO**
  - Areas subject to 1% annual chance floodplain management requirements.
  - Where floodway data are not available, Base Flood Elevations determined.

- **ZONE AH**
  - Areas subject to 1% annual chance floodplain management requirements.
  - No Base Flood Elevations determined.

- **ZONE A99**
  - Areas subject to 1% annual chance floodplain management requirements.
  - Where floodway data are not available, Base Flood Elevations not determined.

- **ZONE V**
  - Areas subject to 1% annual chance floodplain management requirements.
  - No Base Flood Elevations determined.

- **ZONE VE**
  - Areas subject to 1% annual chance floodplain management requirements.
  - No Base Flood Elevations determined.

**Geodetic Survey**

- Survey of the United States Geodetic Survey at the following address:
  - 32°18'45" N 89°40'43" W
  - 28121C0183F
  - 3°50'7" W 2°9'44" E

**Base Map**

- The Base map for this FIRM is a product of the United States Geological Survey (USGS) and was prepared by the USGS South Central Region Office, Dallas, Texas, in 2010. The map is effective as of September 2010.

**Corporation Limit**

- The Corporation Limit is based on the 1% annual chance floodplain boundary or 1% annual chance floodplain boundary determined after this map was published. Map users should contact appropriate community officials to verify current corporate limit locations.

**Flood Control Project**

- The Flood Control Project is the Federal Government-constructed flood control system located in the area and encroachment so that the 1% annual chance flood can be carried without substantial increases in flood losses.

**Zone AE**

- Areas subject to 1% annual chance floodplain management requirements.

**Zone AO**

- Areas subject to 1% annual chance floodplain management requirements.

**Zone AH**

- Areas subject to 1% annual chance floodplain management requirements.

**Zone A99**

- Areas subject to 1% annual chance floodplain management requirements.

**Zone V**

- Areas subject to 1% annual chance floodplain management requirements.

**Zone VE**

- Areas subject to 1% annual chance floodplain management requirements.

**Floodway Data**

- Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.
